2. Simplify  $3(2x + 5x)$  using the two different methods shown below.

- a. Combine like terms, and then multiply.
- b. Distribute, and then combine like terms.

\*3. Solve  $0.45x - 0.002 = 8.098$ .

\*4. **Justify** If you multiply both sides of an equation by a constant  $c$ , what happens to the solution? Explain your answer.

\*5. **Stock Market** An investor buys some stock at \$6.57 a share. She spends \$846.25 which includes a transaction fee of \$25. How many shares of stock did she buy?

\*6. **Multiple Choice** 0.8 is 0.32 of what number?  
 A 2.5      B 0.25      C 0.4      D 4

\*7. **Verify** Solve  $0.45x + 0.9 = 1.008$ . Will both methods shown below result in the same solution? Verify by using both methods to solve.

Method I: Multiply both sides of the equation by 1000 first.

Method II: Subtract 0.9 from both sides first.

8. Identify the coefficient, the variable(s), and the number of terms in the expression  $\frac{1}{5}C + 32$ .

\*9. **Verify** Solve  $0.25x + \frac{1}{2} = 0.075$ . Will both methods shown below result in the same solution? Explain.

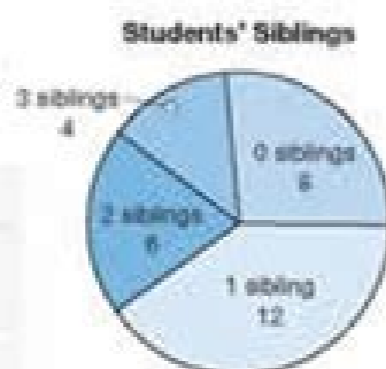

Method I: First write the fraction as a decimal.

Method II: First write the decimals as fractions.

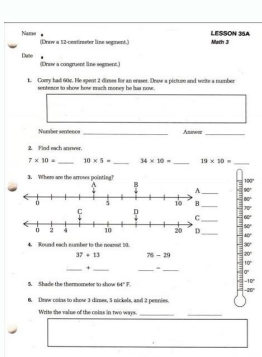

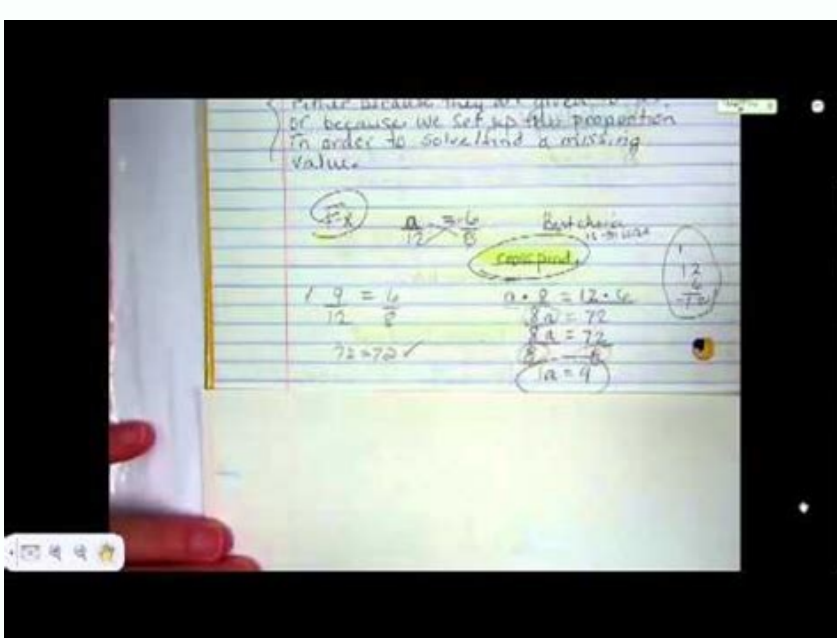

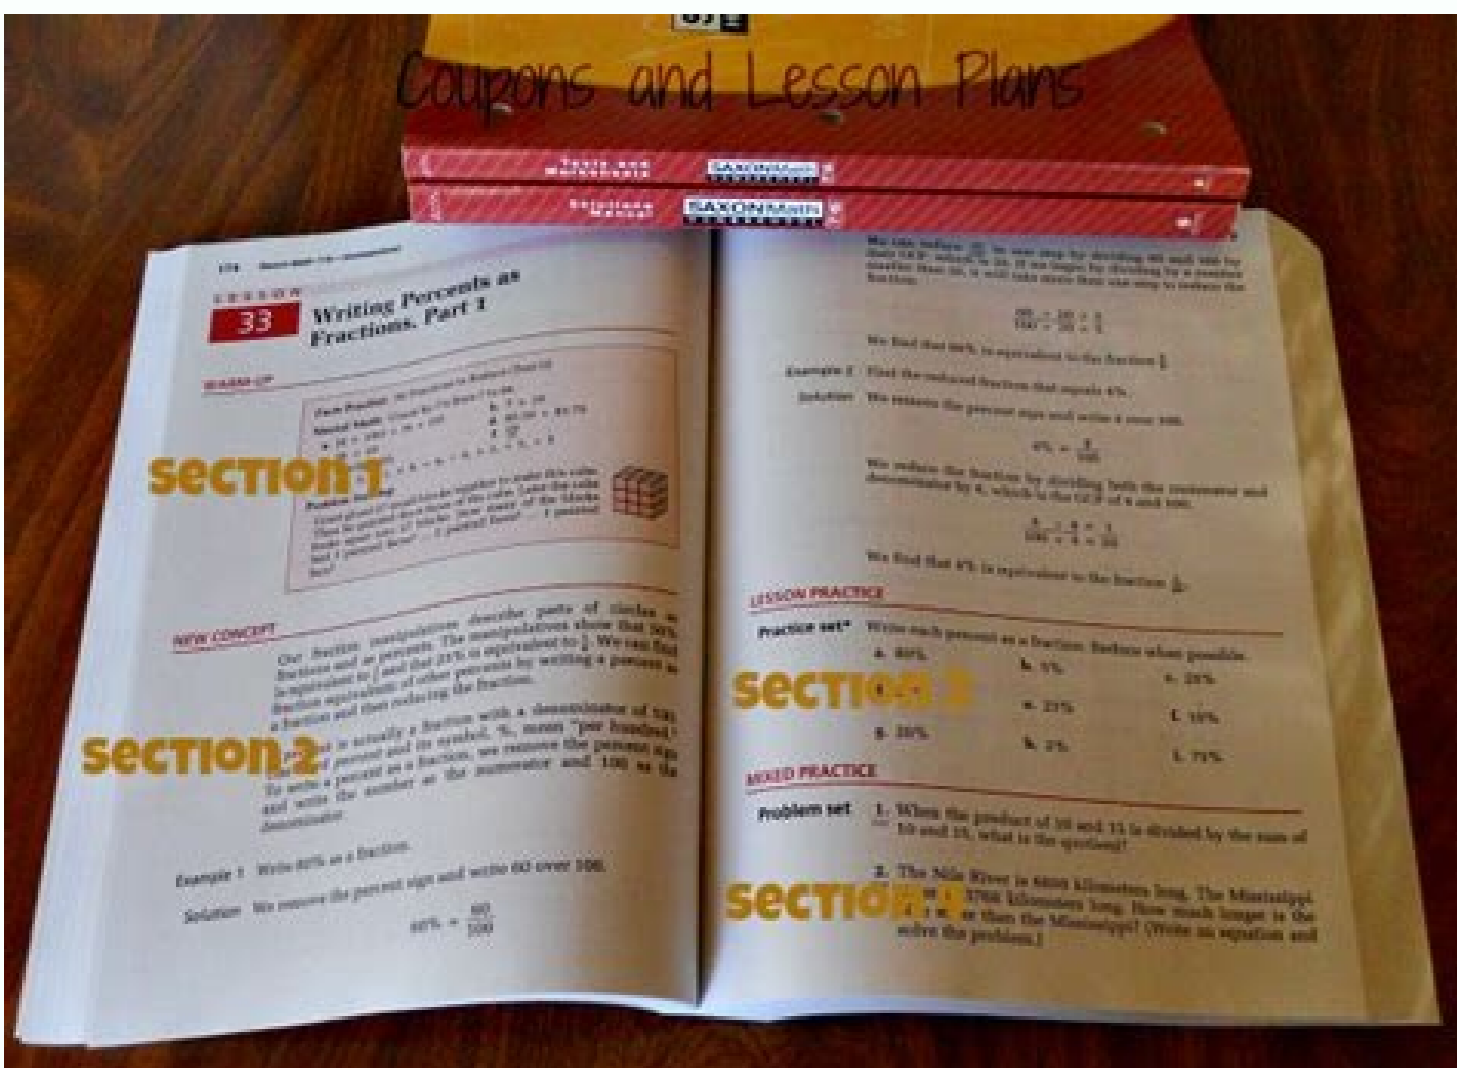

\*10. **Error Analysis** Two students use the circle graph to find the total percent of students who have fewer than two siblings. Which student is correct? Explain the error.

**Student A**  
 0 siblings or 1 sibling = 20  
 20% of the students

**Student B**  
 Total students:  
 $8 + 12 + 6 + 4 = 30$   
 0 siblings or 1 sibling = 20  
 $\frac{20}{30} \approx 67\%$  of the students

\*11. **Measurement** The graph shows an estimation of the changes in the diameter of a tree, in inches, every 20 years. What was the approximate circumference of the tree when the tree was 100 years old? Use 3.14 for  $\pi$ . Round the answer to the nearest tenth.

The math problems for sixth-graders must be leAdos. Time each of the commercials and determine the percentage of commercial time during the entire 3 of the show. In addition (it is not intended that the play of words) must also be able to justify the solution(s) 3 reach when explaining the options they made to reach their answers. The following problems of the word "math" are specific to children in the sixth grade and are divided into the main categories of math: concepts of numbers, patterns and algebra, geometry, 3, and the probability of data. "How many times larger is the square in the area? Children should have the opportunity to discover their own shortcuts and create their own algorithms to determine the appropriate response, or responses. How many tickets were sold after 16 days? Kelly's classroom organized an E-PAL club. The use of Google classroom students can help each other study at the 3 times and ask questions of the task as needed. Students from "week of a look" can see our plan for the week at school. Students are responsible for completing the assigned problems and delivering them to the next school day, unless otherwise noted. Students will be able to complete the test corrections after each test. After one day, a zero will be entered for the assignment3 n. He will be assigned to work from Monday to Friday. 11 people joined the club. How 3 do you know? Students should be able to describe why their solutions work and how 3 know it is the 3 solution. I encourage students to review their grades often and come to me with any concerns3 n.-70% of tests-20% of work/projections/participation n3-10% You accept a job at home for the medium one day after the date of .Asa .Asa aes n3Aicalave amix3Arp artseun odnauc ©Aracilbup ,senreiv led aerat al ojaB .)s( n3Aiculos )s( al rartnocne arap saigetartse saiporp sus raedi euq neneit euq le ne amelborp nu selratneserp se sacit3Ametam rednerpa a soz3An sol a raduya ed sarenam serojem sal ed anU You can prepare.Homework should be organized in a way that helps them correct mistakes.My expectation for the math homework is that it is: complete in lapiz, organized in a two-column format, and the work is shown for each problem.I need to see the work for each math problem so I'm able to help you and see your thinking process when solving a problem. Children should be involved in problem-solving activities every day. Welcome to 6th Grade Mathematics! We will be working on the book of the Session 2 Course. Students can print many useful documents from my website and the Google Classroom: A copy of the math book is linked under "6th Documents" and the Google Classroom. The cashier charged him an additional \$12.07 in sales taxes. If you still can't solve the problem, I would like you to send me an email and put a parent on the email. Students MUST follow the sample format to receive the credit. How much money did he start with? Pets Parade: Mr. James has 14 pets: cats, dogs and guinea pigs. Sam bought eight ball caps, one for each of his eight friends, for \$8.95 each. This can be downloaded to any kindle, iPad, nook, e-reader, etc. Under "Documents 6" there are copies of all our notes from this year and practice copies of each test with published answers showing all the steps of the work. One square is six times the length of the other square. Now, determine the percentage of time that the actual show is on the air. Below is the scale that I will follow when grading the corrections of the exams: For each corrected answer, the student will receive 40% for each question. What are all the possible combinations of pets you might have?How many different types of pizza can you make with the following A pepperoni, tomatoes, bacon, onions and green peppers? Sam left the store with only \$6.28 instead. Students may lose points in the homework by not showing their work or not showing all the steps.If a student is not sure how 3 solve a problem, my expectation is that they will .rewsna .rewsna ruy wohS.dne ot gningeb morf wohs noisivelet eteruvaf ruoy hctaW .loohcS rewoP my country managed me beep lw sedarG.em htw teot tenemnoppa gninrom a RO liame revo mohpleh tepul itinutropo na em wa wolla lliw sihT .snoisulcnoc rieht hcaert yehcaert yehssorp thguh ehlyos nac we necalp neh ineramirewnik where are we W? wonk uwe woH?
